*To Marielle
and Fynn*

Alpha Bones Candy is an ABC book written in Modern Tanka poetry form.

Tanka comes from the Japanese “tan” meaning short and “ka” meaning song.

In traditional five line Tanka poetry, the first and third lines each have five syllables and the other three lines each have seven syllables.

Lp Camozzi loves writing Modern Tanka because the syllable count is not as important. His Tanka poetry is short, musical and fun.
